

# Care On-Going

**Final Presentation**  
**February 3, 2012**

# Aim

- How we can establish safe and effective transitions of care from Regions Hospital to Westside and Open Cities community clinics, in order to, reduce all-cause, non-elective, 30-day readmission rates, of self-pay patients, by 5% by December 31, 2011.

# Evaluation

- AIM was not met by work of this group secondary to the following reasons:
  - Targeted Population had primary MH dx
  - Scope of work that was outlined for this group was already taking place in MH department
- Some relationships were built
- Disparities were not advanced by the scope of this project
- Measures did improve but not because of direct work of this group.

# Sustainability

- Relationships in the community outside of Regions Hospital will be a challenge to sustain but through purported and sincere efforts, this can take place

# Spread

- More community outreach
- Dedicated and purposeful community outreach from Regions Hospital
- Myths associated with Regions Hospital in the community we serve
